

MO-BUTTERFLY is designed in conformity with HACCP and it is a powerful device for preventing and eliminating all kind of insects in the surrounding environment. When insects get close to Mo-Butterfly, they stick on the adhesive papers, which are fixed on the sides.

STRUCTURE AND INSTALLATION

Mo-Butterfly is completely made of aluminum and it is suitable for environments where food is prepared. Adhesive paper can be quickly removed, ensuring an easy and effective cleaning. It can be attached to the wall or to the ceiling. Mo-Butterfly comes with a starting kit of 4 glue boards.

LAMPS

Equipped with two UV-A lamps with a power of 30W and an irradiation of 10-12 mt.

SAFETY

Approved by IMQ in IP55 class and CE compliant. The electric parts, including the UV-A lamps are insulated and protected by the transparent and unbreakable coverage in compliance with health and safety standards.

MADE IN ITALY

TECHNICAL FEATURES	700
Size (mm)	112x435x400 mm (H)
Weight	2,5 kg
Voltage	230V/50HZ
Total consumption	40W
UV-A lamps	2x15 W
Material	Aluminum -PMMA
Range of action	10-12 mt
Protection level	IP55
Adhesive paper (size)	34,5x17 cm
SPARE LAMP	0415

IP55
